RAWABI ARCHER

TUBULAR RENTALS
CASING EXIT SYSTEMS
GAS-TIGHT WELL SUSPENSION
MULTISTAGE CEMENTING TECHNOLOGY

Rawabi Archer Co. Ltd., a Saudi-based joint venture between Rawabi Holding and Archer Limited, is an oilfield service provider specializing in drilling and well services used in offshore and onshore drilling and workover applications.

Traditionally, Rawabi Archer provides equipment, tools and drill pipe rentals for drilling applications in oil and gas fields and is now extending its capabilities with new technology aimed at improving drilling efficiency and well integrity.

Amongst its offerings is the Cflex technology which enables high-performance multistage cementing. Certified 'gas tight' under ISO 14310/14998 V0, and with a permanent lock system, Cflex performs to the highest integrity standards.

Rawabi Archer's Tornar™ wellbore cleaning tools ensure clean and solids-free wellbores. This system enables the removal of debris that interferes with normal operations without damaging the well structure. An effective and successful wellbore cleanup is key to ensure successful completion installation and maximum well return.

Additional technologies include Rawabi Archer's LOCK® series—a range of V0-rated gas-tight plugs designed to offer absolute protection during well suspension operations—and the X-it™ single-trip casing exit system. X-it's unique multiramp whipstock geometry and fourth generation mill provide a step change in sidetrack drilling performance and ensure that sidetracks are delivered efficiently, reliably and with far greater accuracy than alternative systems.

Overall, Rawabi Archer provides customers with services and expertise aimed at helping them to deliver better wells.

About Archer

Archer was established in 2011 but through its many acquired companies has a respected heritage in oil services that stretches back over 40 years.

Archer's main offerings are focused in the critical oil service domains of well integrity, well intervention, unconventional and production drilling. The company leverages its technology and expertise in these areas to achieve its mission of helping operators to deliver better wells—these are wells that produce hydrocarbons safely and profitably, without harming people or the environment.

The company employs approximately 8,000 personnel in more than 100 global locations, with key regional bases in the North Sea, Middle East, Asia, North and Latin America.

Archer is publicly traded on the Oslo Stock Exchange under the ticker ARCHER.
