WELL TESTING SERVICES

Rawabi CETCO, a 50/50 joint venture company between Rawabi Holding and CETCO Energy Services, is a leading well testing services provider to the oil and gas industry since 1968.

Rawabi CETCO provides its customers a fleet of equipment for rapid mobilization to any job site and is capable of handling hazardous flow streams including H₂S, CO₂, solids, high wellhead pressures, and temperatures.

Our Well Testing Applications include:

- On-Site Data Reports
- Temporary Production Facilities
- Well Intervention / Well Cleanup and Flow Backs
- FRAC Flow Backs
- Surface Sampling
- HP/HT Capabilities
- Fardux Idea Server

Rawabi CETCO designs well test packages to meet your requirements, even in well conditions with high pressure, high flow rates and solids.

Our commitment to safety and technological innovation leads to our high level of customer satisfaction. Our dedication to safety and technological innovation is evident in our highly trained personnel and our efforts in research and development.

By operating under strict QAQC procedures and documenting maintenance history on our equipment, we ensure high performance standards and customer satisfaction.

About CETCO Energy Services

CETCO Energy Services, a provider of custom solutions to the oil and gas industry, began its operations in 1997 as CETCO Offshore, a division of Colloid Environmental Technologies Company. That same year, its fluid treatment technology was also introduced in the Gulf of Mexico for treatment of fluids from acid stimulation flow backs and well completions.

In 2003, CETCO Offshore became a separately incorporated entity of AMCOL International and took the name CETCO Oilfield Services Company. Since its inception, the company has grown significantly, both through internal growth and acquisitions. The addition of services has grown out of the needs of our customers, and spurred by our company's desire to link complementary technologies and processes.

With this growth, a rebranding initiative became essential for our customers to better understand our offerings. Therefore, in 2013 we developed into CETCO Energy Services, a company with a truly global presence.

Today, CETCO Energy Services, is a wholly owned subsidiary of Minerals Technologies Inc. (NYSE: MTX) A New York-based resource-and-technology-based growth company that develops, produces and markets worldwide a broad range of specialty mineral, mineral-based and synthetic mineral products and related systems and services. MTI serves the paper, foundry, steel, environmental, energy, polymer and consumer products industries.
